MSG21. << Please ask your parent or guardian to answer these questions with you.>>

MSG22. << Ask a parent or guardian to assist you, or if taking by yourself, share these results with your parent/guardian.>

MSG23. [no Care Message 23]

MSG24. <<Contact an administrator or nurse at your school or child care as soon as possible.>>

MSG25, <<Tell a caregiver in your facility that you may have been in close contact with someone who may have COVID-19.>>

MSG26. << Tell an administrator or nurse at your school or child care that you may have been in contact with someone with suspected COVID-19.>>

# CARE MESSAGES (con't)

# MSG27. <<Stay home and away from others until:>>

- · it has been 10 days\* from when your symptoms first appeared and
- · you have had no fever for 24 hours without the use of medications and
- your other symptoms of COVID-19 are improving\* (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation)
- \* If you have a weakened immune system (immunocompromised) due to a health condition or medication, you might need to stay home and isolate longer than 10 days and possibly 20 days after symptoms begin. In some circumstances, further testing may be needed. Talk to your healthcare provider for more information.

# Additional information (dropdown menu)

- Please inform your close contacts that they have been potentially exposed to the coronavirus that causes COVID—19. CDC recommends that all close contacts of people with confirmed or probable COVID-19 should:
- get tested and
- quarantine for 14 days from the day of their last exposure. You may also receive a call from a contact tracing profession · Get rest and stay hydrated. Take over-the-counter medicines, such as acetaminophen, if needed
- to help you feel bette Separate yourself from other people. As much as possible, stay in a specific room and away from other

people and pets in your home

MSG28. << You may have received a false-negative test result and still might have COVID-19. Contact your healthcare provider about your symptoms, especially if they worsen, about follow-up testing, and how long to isolate>>

MSG29. << While waiting for your test results, isolate at home and follow the advice of your health care provider or public health professional.>>

# MSG30. <<Stav home and away from others until:>>

- . it has been 10 days\* from when your symptoms first appeared and
- . You have had no fever for 24 hours without the use of medications and
- · Your other symptoms of COVID-19 are improving\* (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation)
- \* If you have a weakened immune system (immunocompromised) due to a health condition or medication, you might need to stay home and isolate longer than 10 days and possibly 20 days after symptoms begin. In some circumstances, further testing may be needed. Talk to your healthcare provider for more information.

MSG31. <<CDC recommends that all close contacts of people with confirmed COVID-19 should quarantine for 14 days from the day of their last exposure.>> Check your local health department's website for information about options in your area to possibly shorten this guarantine period. You may also receive a call from a contact tracing professional.

# MSG201, << If you continue to have no symptoms, you can be around others after: >>

 10 days have passed since the date you had your positive test. Watch for COVID-19 symptoms such as fever, cough, or difficulty breathing. If you develop any of these symptoms, call your medical provider, clinician advice line, or telemedicine provider

MSG202. << Ask a caregiver in your facility about when you can resume being around other people based on the results of your testing. >>

MSG203, << Contact the occupational health provider (or supervisor) in your workplace to find out hen you can resume being around other people based on the results of your testing.>>

MSG204. << Contact your healthcare provider to find out when you can resume being around other people based on the results of your testing.>>

MSG205. << Tell a caregiver in your facility that you are not feeling well and need to see a medical provider as soon as possible.>>

MSG206. << Tell the occupational health provider (or supervisor) in your workplace about your symptoms as soon as possible.>>

MSG207, Ino Care Message 2071

MSG208. << Call your medical provider, clinician advice line, or telemedicine provider.>> If you start feeling worse, and you think it is an emergency, call 911 or seek medical care immediately

MSG209. << Tell a caregiver in your facility that you have developed new symptoms and need to see a medical provider as soon as possible.>>

MSG 210. <<Your symptoms may be caused by COVID-19.>> While most people with recover and return to normal health, some people have symptoms that can last for weeks or months after having COVID-19. It's important to notify your healthcare provider of your symptoms because it could affect your health care needs in the future.

# CARE MESSAGES (con't)

# MSG211. <<Stay home and away from others until:>>

- · it has been 10 days\* from when your symptoms first appeared and
- · you have had no fever for 24 hours without the use of medications and
- your other symptoms of COVID-19 are improving\* (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation)

\*If you had severe illness from COVID-19 (you were admitted to a hospital and needed oxygen). your healthcare provider may recommend that you stay in isolation for longer than 10 days after your symptoms first appeared (possibly up to 20 days) and you may need to finish your period of isolation at home. Talk to your healthcare provider for more information Additional information (dropdown menu)

<< Please note:>> While most people recover and return to normal health, some people have symptoms that can last for weeks or months after having COVID-19. It's important to notify your healthcare provider of your symptoms because it could affect your health care needs in the future.

MSG212. << Watch for COVID-19 symptoms such as fever, cough, or difficulty breathing.>> If you develop any symptoms, contact your healthcare provider to ask about retesting, and stay home and away from others until:

- it has been 10 days from when your symptoms first appeared and
- · you have had no fever for 24 hours without the use of medications and
- · your other symptoms of COVID-19 are improving\* (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation

# MSG213. << Watch for COVID-19 symptoms such as fever, cough, or difficulty breathing.>> If you

- develop any symptoms, contact your healthcare provider, and stay home and away from others until:
  - it has been 10 days from when your symptoms first appeared and
  - · you have had no fever for 24 hours without the use of medications and
- your other symptoms of COVID-19 are improving\* (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation

MSG214. << As soon as possible, tell your occupational health provider (or supervisor) that you may have been in close contact with another person who has tested positive for COVID-19 in the last 14

MSG215. << While waiting for your test results, isolate at home and follow the advice of your health

MSG216. << Tell a caregiver in your facility that you may have been in close contact with another son who has tested positive for COVID-19 in the last 14 days.>>

MSG217. << If you tested negative after being exposed to a person with COVID-19, you are likely not infected, but you still may get sick. Self-quarantine at home for 14 days after your exposure. Watch for COVID-19 symptoms such as fever, cough, or difficulty breathing.>>

If you develop any symptoms, get tested for the virus that causes COVID-19, and stay home and away from others until:

- it has been 10 days from when your symptoms first appeared and
- It has been I outpays froll whele you symptoms insix appeared and you have had no fever for 24 hours without the use of medications and your other symptoms of COVID-19 are improving "t'loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation) Additional information (dre

<<Please note:>> Check your local health department's website for information about options in your area to possibly shorten this quarantine period. You may also receive a call from a contact

MSG300. << Tell a caregiver in your facility that you are sick and need to see a medical provider as soon as possible.>> Stay in your room as much as possible except to get medical care.

MSG301. << Call your medical provider, clinician advice line, or telemedicine provider as soon as possible.>> You also have medical conditions that may put you at risk of becoming more seriously ill.

MSG302. << Tell the occupational health provider (or supervisor) in your workplace that you're feeling MSG303. << Regardless of vaccination status, if you have been in close contact of another person who has tested positive for COVID-19 in the last 14 days, you should quarantine for 14 days from the day of your last exposure.>> Check your local health department's website for information about options in your area to possibly shorten this quarantine period. You may also receive a call from a contact racing

MSG304. << Watch for COVID-19 symptoms such as fever, cough, or difficulty breathing for 14 days

If you develop my emptons, get tested for SARS CoV-2, and stay home and away from others until:

\* That been 10 days from when your symptoms first appeared and

\* That been 10 days from when your symptoms first appeared and

- you have had no fever for 24 hours without the use of medications and
- your other symptoms of COVID-19 are improving\*
  (\*Loss of taste and smell may persist for weeks or months after recovery and need not delay the

MSG305. << Tell a caregiver in your facility that you may have been in close contact with another person who has tested positive for COVID-19 in the last 14 days.>>

SG306. << Tell an administrator or nurse at your school or child care that you have tested positive for

MSG307. << Tell a caregiver in your facility that you have tested positive for COVID-19. Ask about when you can resume being around other people based on the results of your testing.>>

# **Testing Messages and Appendix**

# TESTING MESSAGES

TO. << Based on the answers given, you do not need to get tested unless recommended or required by your healthcare provider, employer, or public health official.>>

# T1. [no testing message T1]

T2-International << You may be eligible for COVID-19 testing.>> Contact your local emergency services

T3. <<CDC recommends that all dose contacts of people with confirmed CDVID-19 should>>
get tested and
quarantine for 14 days from the day of their last exposure. Check your local health department's
website for information about options in your area to possibly shorten this quarantine period. You may
also receive a call from a contact tracing professional.

T4. <Regardless of vaccination status or prior infection, CDC recommends that anyone with symptoms of COVID-19 should get tested and follow the advice of your healthcare provider.>> Contact your local or state health department to find a testing location near you.

T5. << Further testing is not needed unless a healthcare provider recommends it.>>

T6. <<Further testing may not be needed at this time, unless recommended by a provider.>>

T50. << Because some of the symptoms of flu and COVID-19 are similar, you may want to consider asking your provider about testing or treatment for influenza. >> See this CDC webpage for more information about COVID-19 and influenza.

T100. <<You do not need to quarantine or get tested as long as you do not develop new symptoms.>>
Ask your healthcare provider about getting tested again if you have been in close contact with another
oerson who has tested oositive for COVID-19 in the last 14 days

# T101, << Ask your healthcare provider about getting tested again>>

- if you have been in close contact with another person who has tested positive for COVID-19 in the last 14 days or
   if you develop new symptoms.

T102. <<You may continue to test positive for three months or more without being contagious to others.>> Talk with your healthcare provider about your test result and the type of test you took to understand what your results mean.

T103. <<Regardless of vaccination status or prior infection, you may need to be tested again if there is no other cause identified for your symptoms.>>Ask your healthcare provider about getting tested again for SARS-CO-2 infection to consider the possibility of reinfection.

T104. <<Ask your healthcare provider about getting tested again, especially if you have been in close contact with another person who has tested positive for COVID-19 in the last 14 days.>>

T105. << Talk with your healthcare provider about your test result and the type of test you took to understand what your results mean.>>

T106. <<if there is no other cause identified for your symptoms. Ask your healthcare provider about getting tested again.>> Talk with your healthcare provider about your test result and the type of test you took to understand what your results mean.

T107. <<Because you have been in close contact of another person who has tested positive for COVID-19 in the last 14 days, CDC recommends that you quarantine for 14 days from the day of your last

T109: << Based on the answers given, you do not need to get tested unless or by your healthcare provider, employer, or public health official.>>

T200. << Although the risk of being infected with the virus that causes COVID-19 is low if you are fully vaccinated, you should get tested and stay home and away from others, except to get medical care, until:>>
